

**The Foundation for a  
Cure for Mitochondrial Disease, Inc.**

Each year, more than 4,000 people in the United States are diagnosed with Mitochondrial Disease, many of them young children. This ravaging disease can present itself in many different ways with symptoms such as muscle weakness and pain, cardiac disease, diabetes, liver disease, respiratory difficulties, seizures, lactic acidosis, developmental delays, susceptibility to infection, and more. Most often, symptoms get worse with time and lead to death.

There is no cure for Mitochondrial Disease...yet. That's why there is *The Foundation for a Cure for Mitochondrial Disease, Inc.* We are committed to finding hope for all who suffer. You can help.

*The Foundation for a Cure for Mitochondrial Disease, Inc. (MitoCure)* was founded by Bill and Sandy Cunningham in August of 2000 after their daughter Kelly was diagnosed with a Mitochondrial Disease. Since that time, Kelly's fight with the disease has ended; she passed away in 2005. Not wanting other parents to experience the same heartache, Bill and Sandy remain committed to finding a cure for Mitochondrial Disease through the work of *MitoCure*.

*MitoCure* exists to educate communities, to provide support for families, and to generate financial support to find a cure for Mitochondrial Disease. All operating costs are covered through private contributions, and all board members are volunteers. This allows 100% of all donations to go directly to research efforts around the world.

Scientists are making tremendous strides in finding a cure for Mitochondrial Disease, but funding is limited. *MitoCure* exists to gather donations from caring individuals and corporations and use them to support the most promising research in the world for a cure for Mitochondrial Disease.

At present, tens of thousands of children are suffering the ravaging symptoms of Mitochondrial Disease. For these children, sickness and pain are all too real. They need hope. They need our help.

To find out how you can partner with *MitoCure* to make a difference, please go to [www.mitocure.org](http://www.mitocure.org) or call 203-699-0022. Please, help find a cure.
